

About Steve Goreham

Steve Goreham is a speaker, an author, a researcher on energy and environmental issues, and an independent columnist. He speaks and writes about energy, industry, agriculture, the environment, sustainable development, economic trends, climate change, and corporate environmental policy. Steve is the Executive Director of the Climate Science Coalition of America and an advisor to The Heartland Institute.

Goreham has been speaking to business, industry, and educational organizations for more than a decade. His past appearances in industry include agriculture, engineering, materials, metals, oil and gas, transportation, and utility groups. He has spoken at events of the Alaska Support Industry Alliance, the American Copper Council, the American Foundry Society, the American Galvanizers Association, the Association of Equipment Manufacturers, the Association for Iron & Steel Technology, the Chevron and Texaco Petroleum Marketers Association, the Forging Industry Association, the Investment Casting Institute, the Plastics Pipe Institute, and many other industry groups.

Goreham is an author of four books on energy, climate change, sustainable development, and public policy, including his latest, *Green Breakdown: The Coming Renewable Energy Failure*. More than 100,000 copies of his books are now in print. *Green Breakdown* has been the #1 Amazon bestseller in the Oil & Energy Industry category several times.

Steve is a frequent guest on television and radio. His TV appearances include Fox Business Channel, Pat Robertson, WTTW11, and the Joe Donlon Report. His radio segments include Frank Beckmann, John Catsimatidis, Roe Conn, Bill Cunningham, Lou Dobbs, Sean Hannity, Lars Larson, Dennis Miller, George Noory, Joe Pags, Janet Parshall, and Todd Starnes, as part of more than 400 radio show appearances.

More than 100 of Steve's articles have been published in *Breitbart*, *Energy Central*, *Master Resource*, *The Daily Caller*, *The Washington Times*, *The Wall Street Journal*, *Washington Examiner*, *Western Journal*, *World Net Daily*, and other publications. His articles cover a broad array of topics, such as acid rain, battery storage, biofuels, climate change, the fracking revolution, hydrocarbon and renewable energy, meat consumption, the ozone hole, pollution, resource depletion, sustainable fuels, and wildfires.

Steve is a graduate of the University of Illinois at Urbana, receiving a Bachelor of Science and Master of Science Degree in Electrical Engineering in 1976 and 1977. He received a Master's in Business Administration from the University of Chicago in 1983.

Goreham's business experience includes 30 years in engineering and executive roles in product development, sale, and manufacture of wireless and wired communications products and systems for global markets at Fortune 500 and private firms. He served as division general manager and member of the policy committee at his last company.
